PROJECTS

Jan 2023 – March 2023

Ecommerce Website(Vibik):-

- Developed a full-fledged Ecommerce platform using the MERN stack, allowing users to browse and purchase products seamlessly.
- Implemented user authentication, product categorization, and integrated payment gateways for a streamlined shopping experience.
- Utilized React.js for a responsive front-end and Node.js/Express.js for robust server-side functionalities. Managed data with MongoDB.

Real-Time Chat Application with Chatbot Integration (MERN Stack)

- Engineered a real-time chat application with the MERN stack, enabling users to engage in instant messaging.
- Implemented features such as user authentication, real-time message updates, multimedia sharing, and chatbot functionalities.
- Leveraged WebSocket technology for efficient communication and utilized React.js for the front end, alongside Node.js/Express.js and MongoDB for backend operations.
